# MEETING REPORT #8

**Date:** 7 December 2004

**Time:** 11.00- 11.45

**Location:** Computer Engineering Canteen

**Attendees:** All members

**Purpose:**

- Keeping track of each member's work for the initial design report
- Making necessary modifications on the structure of the report if necessary after the comments of the members

**Details on mentioned topics and decisions:**

- We made some modifications on the content of the report after meeting by the assistant. These are:
    - It was not necessary to include graphical user interfaces so Gokçen slowed the progression of the graphical user interfaces and she was assigned some of the drawings of UML diagrams.
    - It was not necessary to include database tables so Nazmiye slowed down the database progress and she was assigned some of the drawings of the UML diagrams like Gokçen.
    - But they did not stop developing their parts since our project is making progress time to time.
- We shared our work and beware ourselves of the modifications on the database, class diagrams and sequence diagrams.
