2nd Meeting Report

Team Name: CoreTech
Attendees: All Team Members
Meeting Place: Computer Engineering Department, 2nd Floor
Meeting Date/Time: 06.10.2005, 19:30 - 21:30

- This meeting’s basic aim is to review and improve first version of our proposal report by highlighting the social aspects of our product based on the comments of our project assistant Oral Dalay.

- In the first version of our proposal, we had proposed two alternative application areas. In this meeting, we decided on the Location Based Information System. There were lots of application areas for this specific topic, so we reduced these alternatives to 5: Cinemas, theatres, sport halls, concert halls and additionally transportation system which involves the previous 4.

- We decided to include ontology into our project. Ontology will enable our product to suggest alternative results to the user. This is a property which will apparently please the user.

- Our development environment research continues. J2EE (Java) and .Net are the alternatives which are on the scene. Till our next meeting, all members of the team are responsible of making further research about alternative environments.

- We fixed the time of our weekly meetings, namely every Tuesday of the week between 19:00 and 21:30.
