This week, we completed the requirement analysis report of our project.

Ilgin YARIMAĞAN

This week I focused on extending the ideas we determined in Requirement Analysis Report. I started to consider how to construct the structure and modules of the project in a more detailed way.

Emin ÖZCAN

For the last two week, I was busy with the requirement analysis report. First of all, we organized a meeting for determine the graphical interface and usage of it. In addition ,we also decided the run principles of the system. Secondly, I started to do my duties for the requirement analysis report. I wrote down usage scenario. Then, I thought about the data flows of the system,and drew three data flow diagrams. Lastly,me and Eren started to determine the project plan and we drew the project time chart. Also we determined the References and added them to the requirement analysis report. After finishing all works about requirement analysis report,we also did a spell check by reading the report from start to end.

M.Ergin SEYFE

Last week, I worked on requirement analysis report. After several team meetings, we specified and divided the duties to every team member. I was busy with my duties and also the coordination of the group. So, last week I spent all my time to this report. However, this week I found no time to interest in our project because of my other homeworks and projects.

Eren YILMAZ

This week, our time was spent on the requirement analysis report. First we gathered together, and discussed on the requirements of our project. After deciding every topic, everyone was assigned some parts of the report. Everyone did the part he/she took and submitted them to me. I controlled them, revised the format and compiled in a single file.

Mehtap Ayfer PARLAK

This week, we prepared our analysis report and we determined the requirements of the project. I have prepared the behavioral model and the state chart of the system which specifies the system modes and the transitions between these modes. Moreover; graphical user interface requirements are determined together then I wrote these requirements more detailed and in a formal format.
