

ORION®

This week we completed our Initial Design Report.

Ilgin YARIMAĞAN

This week we worked on the initial design report. We constructed the class diagrams, sequential diagrams and use cases of our project. Also we decided the file format of our program and basically determined how will the gui of our program will look like.

After the initial design report I started to think about how to extend these class diagrams in a more detailed way for the detailed design. I thought about what additional methods the classes may need.

Eren YILMAZ

This week, we finished our Initial Design Report. I worked on the scripting classes first, and after finishing them, worked with my teammates in designing GUI and other parts of our project. After finishing the report, I began thinking on the inner structure of the scripting engine.

Emin ÖZCAN

This week,we all prepared our initial design report. I worked the main class diagram and simulation class diagram and their description part in this report. After preparing the report,i worked with Eclipse to develop myself in GUI design area. But, because of my other lectures duties i could not do much more job for our project.

M. Ergin SEYFE

At the beginning of this week, I worked with the initial design report. My task was generally UML diagrams (Use Case, Class and Sequence diagrams). After submitting initial design report, I only think how to improve our design and try other solutions, which will make it easy to implement and efficient application.

Mehtap Ayfer PARLAK

This week, we generally focused on our initial design report until Monday. Ilgin and I determined the GUI design; such as drawing the class diagrams, sequential diagrams and use cases of GUI and its actions. Also we wrote some part of the design report.
