

Installation Guide

VoidSim comes as a exe, so one do not need to install it. But before all, be sure that Java VM 1.5 is installed in your system.

The steps one should follow in order to run VoidSim are as follows:

- Download the archive file VoidSim.
- Extract it.
- Edit the system variable Path. (you should add the path of your jre bin. For example C:\Program Files\Java\jre1.5.0_06\bin)

- In the folder of VoidSim you will find some dll's. Copy them into the jre bin. (Possibly in this address : C:\Program Files\Java\jre1.5.0_06\bin)
- Now you are ready to run VoidSim, by only clicking on the icon of the Voidsim.exe
