MIDDLE EAST TECHNICAL UNIVERSITY
COMPUTER ENGINEERING DEPARTMENT

PROJECT MEETING REPORT 9
02.01.2008

AQUT
Anatolian QUalified Technology
Meeting summary

This week, there was no individual study for AQUT. The entire job was done as a group. First duty of AQUT for this was the presentation. Since our problem definition was not good enough, problem was redefined and other presentation materials were prepared. However, there are still some modifications that need to be made regarding the entire concept of the project.

Detailed studies were made about DWR library during this week. Some basic examples were tried on browser and we saw that java codes are running on the browser. Coming days, we will try to adopt DWR library to our Firefox extension study. We have also studied at this issue, we couldn’t succeed.

We prepared java class for instant messaging between two users In Eclipse. We manage to communicate on spark with other user by using this java code. Coming days, we try to adopt this code to our Firefox extension.
