Weekly Report #4

This Week:

- Routine weekly meetings are done.
- Web site regular checks are done. Site is deployed under the given account on department server.
<http://senior.ceng.metu.edu.tr/2008/coss/>
- CEng 336 Embedded Board is lent.
- Pardus was installed.
- Compilation of academic release was completed on Pardus.
- We decided on the LCD that will be used on AP-490. As project grows, some of our decisions can change in order to make AP-490 more user friendly.

Next Week:

We will buy two LCDs with different color and resolution:

- Our first choice is a multicolor LCD with 128X128 resolutions. We will order this one from www.sparkfun.com and it will be shipped to us from USA.
- Second one is a single color LCD with 128X64 resolutions. We will order this one from Endikal Electronics in Istanbul.

Kürsat ÖZER	Web site regular checks will be done. Former LCD will be ordered and its shipping will be arranged.
Ümit SIVRI	Tftp server and cutecom will be installed. Package will be installed on AP-400, with Emre.
Gözde KIRDAR	Some applications will be performed for PIC16F877 and LCD on CEng development kit. Latter LCD will be ordered from Endikal Electronics via phone.
Emre KOSTUR	Tftp server and cutecom will be installed. Package will be installed on AP-400, with Ümit.
