Weekly Report #6

This Week:

- Routine weekly meetings are done.
- Web site regular checks are done.
- Ceng336 Embedded Board studies started.
- LCD is delivered to us. It has a blue background screen with white lights.
- We tried to obtain MAC addresses from AP-400. We prepared a script for this purpose. The script works for all PCs currently connected and displays them on screen. The number of connected PCs is also obtained.
- The design patterns are specified and divided into parts.
- Some additional programs for embedded board are downloaded. Installations of them are completed.

Next Week:

We will obtain datasheet of LCD which is delivered. Design reports will be submitted next week. All members are preparing their parts.

Kürsat ÖZER	Web site regular checks will be done. Initial design report, final phase will be prepared and submitted.
Ümit SIVRI	Design report diagrams are being drawn. AP-400 studies continue with Emre.
Gözde KIRDAR	Embedded board studies will continue. The needed programs will be get used.
Emre KOSTUR	Retrieving data from AP-400 will continue. Wanted data will be retrieved with Ümit.
