FREELANCERS
Weekly Report
Week-3

For Group

In the Saturday meeting we have discussed the concept and content of the project and made our mind understand certainly same thing from the project. We have shared the to do items for the report. We have met on Saturday, Monday, Wednesday and Friday. In each meeting we have combined what we have found separately. In next week, we will give a start to initial design report studies.

Yağız Kargın

In the meeting, I have made my friends a small presentation which explains JSP. I have studied again JSP this week. I have read many articles from the Sun JSP site. Then using the articles and papers I have written a literature survey about JSP. I have learned and written the differences between JSP and the other server side scripting languages. I have done a questionnaire for the user survey and written the user survey part of the report. In the last two days I have drawn entity relationship diagram with Serhat.

Caner Kavakoğlu

This week I have done Marketing Research and Jabber (XMPP) literature survey for the Requirement Analysis Report. I also make scheduling for the project and draw a "Gantt Chart". With the schedule in our hands we will proceed easily. Marketing research show how our project will be useful and what we need to do for users' expectations. I also helped to draw DFD for the Requirement Analysis Report. Report's introduction and conclusion parts were also my duty to write with my friends help.

A.Kutlu Şahin

This week I have completed studying the concepts of Ajax, JavaScript and XML and prepared the literature survey part of the requirement analysis report. Then I participated in writing the use cases and usage scenario parts of the requirement analysis report. I have also helped for the DFD and risk management part.

Serhat Alyurt

This week, I introduced my friends about UML. Also, I constructed the Use-Case diagrams and explained them with Kutlu. Additionally Kutlu and I wrote usage scenario. I helped for Data Flow Diagrams and risk management parts of the requirements analysis report. In the last two days I have drawn entity relationship diagram with Yağız.
