

FREELANCERS
WEEKLY REPORT#9
26.04.2008

Group(this week):

Everyone has done his job that he was assigned to by the short time plan for version 2.

Yağız:

This week I have worked on search issues. I have corrected some mistakes in group search and I have dealt with the integration of the new classes with the jsps.

Caner:

This week I have worked on friend related methods for the profile module. I have started working on dictionary related functions, but have no time to finish all.

Kutlu:

This week i have dealt with the file management issue of the project. i have searched about the blob object of the database and we decided that this is not needed for us to use this object. i have made some changes in the database structure and check the the java classes that i have implemented last week.

Serhat:

This week, I have worked on chat related issues. Şevket (from AQUIT) sent us some informations about Smack API. Through those informations, I revised w-expert chat module. I composed a new chat module design and discussed on that with my friends.

Group(next week):

Next week everyone will be dealing with jobs that are assigned to him. Next week Yağız will be continuing dealing with integration. Serhat will implement new chat module and release it. Kutlu will be implementing the user info and usersearch classes and making adjustment of the database tables . Caner will deal with javascript codes. Everyone will work on version 2.
