

## **Weekly Performance Report**

### **OKAN Group**

**30.04.2008-13.05.2008**

#### **Evaluation of the Week:**

During the first week the group worked on implementing and deploying new features into Photokan in order to demonstrate in version 2 demos. The user interface of the orthophoto generation module has been completed. The image processor user interface has been redesigned. The save facility was implemented but not deployed for the version 2 tag.

During the second week, the group members worked on finalizing the mosaicker module. Customization of algorithms parameters has been extended.

#### **Personal Performance Evaluation:**

##### **Okan AKALIN (1448273)**

I worked on the interface of the orthophoto module and enhanced our ImagePanel class to handle the viewing needs for region of interest selection.

##### **Kazım Işık (1448760)**

I worked on the integration of the image processor module and its interface to the Photokan.

##### **Görkem Kurt (1395250)**

I implemented several image processing facilities that had to be made before version 2 demo (rotation and scaling) and I worked on enhancement of mosaicker module interface.

##### **Yunus OLGUN (1448992)**

I revised the codebase of orthophoto module and deployed the updates for mask generation to the CVS. Also several bugs were removed before version 2.
