

What We Have Done Last Week :: Team

Last week, we have dealt with living schedule. We have started implementation. We had some missing pieces in our code. We tried to complete them. Addition these, we have dealt with Configuration management plan. We have decided to continue using SVN that is provided by AGMLab as configuration management tool.

What We Will Do Next Week:: Team

Following week, the first thing that we will do is preparing a configuration management plan. After configuration management plan we will continue to implementations. Bugra will study on Solr. We are planning to integrate Lucene before end of the week. Ruslan will work on Javascript parts and Serdar will work on some database design changes. I am planning to work on WAP and fix some connection bugs.

What We Have Done Last Week :: Individual

M.Arif UGUREL

I have worked on previous written codes. I have study on WAP a little. I also help to prepare living schedule. I have prepared SVN repository also.

Ruslan Abdulla

To put our new works to SVN before deadline I make some code configurations to shorten the existing code. Besides I added new script type works. In addition to this I worked for preparing configuration management plan and as a team made decisions for sharing tasks.

Buğra Hasbek

Since we must deliver our Configuration Management Plan in this weekend my team got together and discussed for forthcoming tasks and strict responsibilities in this semester and of course worked for CMP. I worked in making nice the code while updating SVN.
