

What We Have Done Last Week :: Team

Last week we have focused on implementation. The deadline of prototype 1 is getting closer every day, we have to be well prepared before deadline. Last week we have mostly focused on Solr deployment and how to use, implementation of jabber related parts such as identifying online/offline status and javascript library.

What We Will Do Next Week :: Team

We have divided the whole work last week. We will stick to this plan. Arif will work on jabber related parts. He will implement the background of chat using Smack API. Buğra will work on Solr. Serdar and Ruslan will work on javascript library(DWR) to handle refresh problem in the chat window. There is too much work before prototype 1, it seems next week will be very exhaustive.

What We Have Done Last Week :: Individual

M.Arif UGUREL

I have focused on background of the project. I will improved searching and connecting parts. Now Marpuch decides which expert is online or offline. I have integrated this part to the project successfully. I have implemented a new Java class to do this.

Ruslan ABDULLA

This week I mostly dealt with implementing dwr library. I could not use it as I want. So I guess I'll keep dealing with it more few days.

Bugra HASBEK

This week I focused on deploying Solr to Tomcat. I managed to deploy Solr by editing startup.bat of Tomcat however this solution will not work on Marpuch because Netbeans probably uses a custom script for starting Tomcat. I also requested a personal meeting with Cagatay Calli and we discussed possible solutions for deploying Solr and decided to make an other meeting on next Tuesday.

What i will do next week:

Next week i will continue my efforts for deploying Solr to Tomcat. On Tuesday I have a meeting with Cagatay Calli. I will make some internet research about inner workings of Netbeans before the meeting. I hope that we will be able find a way to deploy Solr on Tuesday meeting. If a solution is found i will start implementing "keyword relation" feature. This will revolutionize Marpuch.
