

This week as a team

This week all got together and started to new tasks. Everyone got his task and started to implement. We have get into wap and complete registration page with a user friendly interface and of course finding relationships between tags by discussing many alogrithms.

Next week as a team

Next week we are planning narly complete relations between tags, fully complete registration page and gathering enough information to start to wap. Besides we think we will have something to show firstcoming meeting

Ruslan Abdulla

This week I worked with registration page. Since we could not use dwr it have some difficulties to finish this page. However I thing it will be complete by next week.

M. Arif Uğurel

After fixing problems related to jabber I started to find some algorithms in designing tag relationships. I coded some java codes related to this topic

Buğra Hasbek

Since solr works only on my computer I mostly dealed with it. I tryie to fix the problem in which substrings were not shown searches. Besides I worked with Arif to figure out the problem that we can face with in coding tag relationships.

Serdar Saygılı

I looked at how to implement wap. Although it may seem to be hard, I asked some issue to forums and since Arif have idea on it I discussed some points with him
