

## **GROUP WEEKLY REPORT**

**Project Group : ACME Soft**

**Project Name : EDUPLAN**

**Date : 07.01.2009**

### **Kadir Kaan Evren :**

This week I started to design our web page. I also made brainstorm on the issues that we had discussed after our presentation which was about data demonstration of our model. By the way we also made some research about how we can make the system scalable through web.

Next week I will help my friends to finalize our design.

### **Sami Akkuş :**

This week I go on designing our database and doing implementation. Firstly, I have developed necessary queries and have implemented the stored procedures which we will use them in our data layer. I have also developed the views.

### **Candan Bölükbaş**

This week I designed the graphical user interface in Macromedia Fireworks. Then I exported the GUI to html and created css design. I have also constructed the related master pages which will be used in our dynamic user interfaces.

### **Mustafa Çağlar Yavuz :**

The last two weeks, I went on learning and the software development tools we will use. I have looked at the detailed design prototypes and old reports. I started to implement the classes necessary for our framework.
