

DEMO - 4

What we have done...

- After comparing A^* and D^* , A^* algorithm has chosen as our planning algorithm.
- Elif has completed the first implementation of A^* using Geokit. (only taking the elevation into account)

What we have done...

- Duygu Yapa has implemented drawing a route on 2D visualization with dummy coordinates.
- She has added color to 2D visualization.

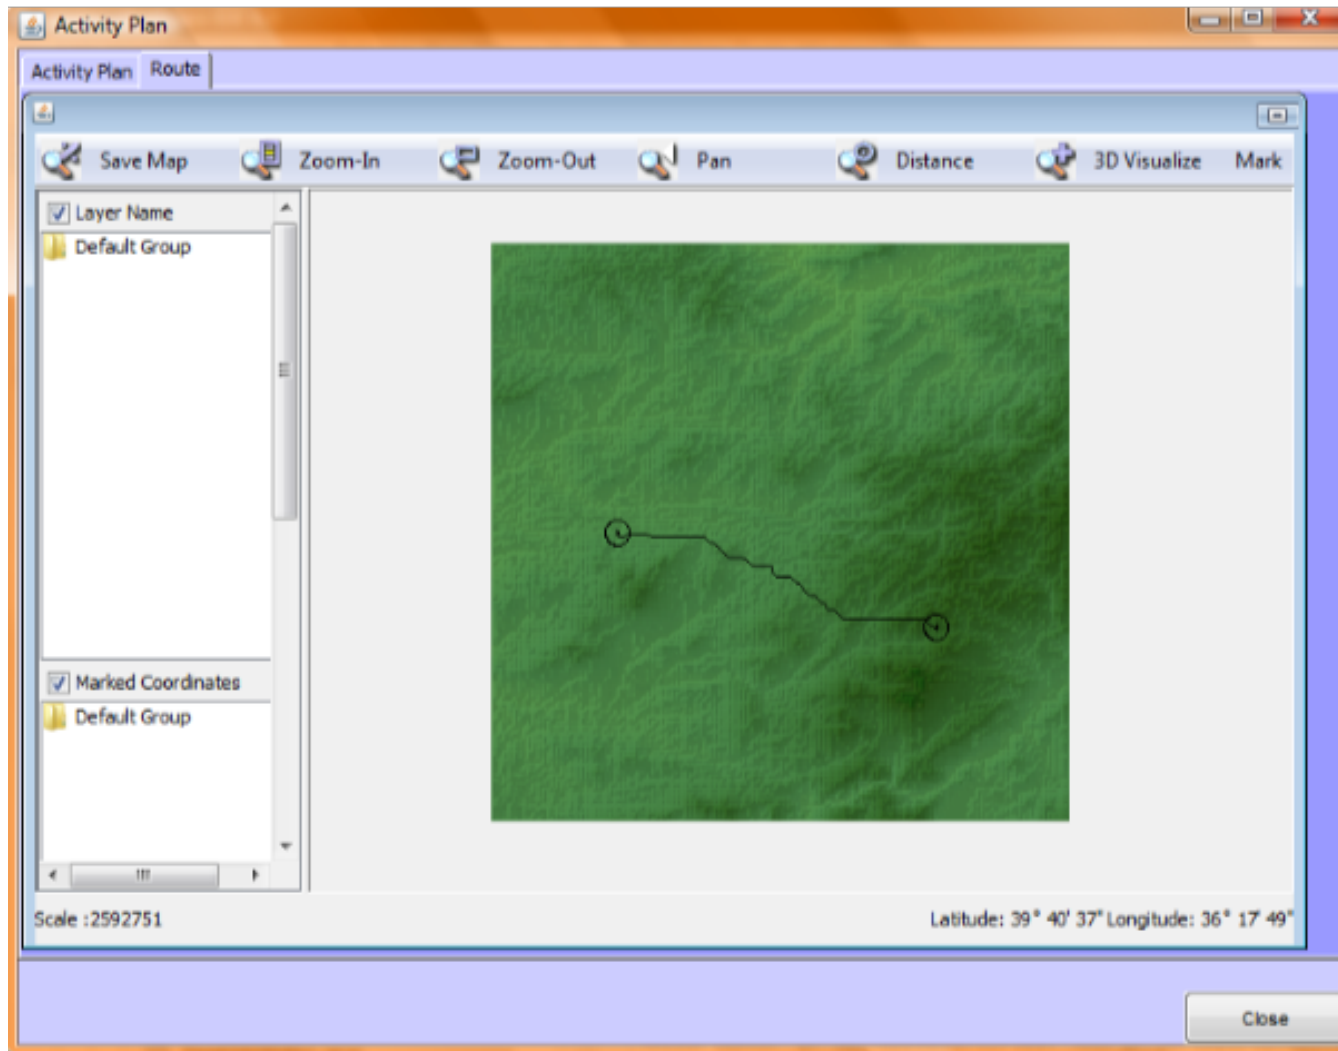

What we have done...

- Ayşe has implemented saving of 2D visualization as image (in png, jpg or gif format).
- She has entegrated Elif's and Duygu Yapa's work with the GUI. And here is the real route on 2D visualization.

GUI-A* Entegration

Real route on 2D Visualization
