Weekly Progress Report - 8

BUGBUSTERS

27.04.2010

Work Done:

- Işıl implemented the 50% of the knowledge database.

- Caner worked on design of web pages.

- Çağrı read GeoWeb with JavaScript Viewer Developer's Guide and OpenLayers Tutorial. Combined the features with GeoServer to get Live Train Monitoring Page working.

- Burkay started implementing the machinist interface.

Work to Do:

- Caner will prepare data sets of train schedules and load them into our databases.

- Işıl will continue implementing knowledge database.

- Çağrı will work on Google Earth integration of Live Train Monitoring Module; mainly on updating and reading the KML files regularly within the program.

- Burkay will continue working on machinist interface, integration of GPS simulator and accelerometer to that interface.
