Weekly Progress Report - 9

BUGBUSTERS

04.05.2010

Work Done:

- Işıl implemented the update module.

- Caner prepared data sets of train schedules and load them into our databases.

- Çağrı worked on updating the KML files regularly within the program, reading and showing them in Google Earth.

- Burkay implemented some part of the machinist interface.

Work to Do:

- Caner will prepare the schedule interface and load data into databases.

- Işıl will implement the schedule module.

- Çağrı will work on updating the train positions inside the web browser with using OpenLayers JavaScript technologies.

- Burkay will continue working on machinist interface, integration of GPS simulator and accelerometer to that interface and edit the previously implemented simulation interface to destroy the ambiguities.
