Weekly Report 4

Written by Administrator
Wednesday, 30 March 2011 20:52 - Last Updated Wednesday, 30 March 2011 21:03

Period: 22-29 March

Events:

- We have discovered how to use svn with our project and made our first commit to SVN.
- We have created keys for ssh in order not to enter password each and each time svn tries to make a connection with the server.
- Uploaded first versions of PlateLocator and PlateReader classes

In Next Week:
- We will port our user interface to QT
- We will create tickets for development in trac
