BUGBUSTERS
27.04.2010
**CENG 492 - Weekly Progress Report 8 – Bug Busters**

**Work Done:**

- İşıl implemented the 50% of the knowledge database.
- Caner worked on design of web pages.
- Burkay started implementing the machinist interface.

**Work to Do:**

- Caner will prepare data sets of train schedules and load them into our databases.
- İşıl will continue implementing knowledge database.
- Çağrı will work on Google Earth integration of Live Train Monitoring Module; mainly on updating and reading the KML files regularly within the program.
- Burkay will continue working on machinist interface, integration of GPS simulator and accelerometer to that interface.
