

## MEETING REPORT --- 08.11.2006

Hasan İşler

Last week I had worked for preparing the analysis report of our project. According to our division of labour I was responsible for the analysis report. After we got together we made the division of labour. So I started examining the samples of the reports on the net. After we worked individually we got together again and finished the report. This report is very important for our next steps. We made a plan and sketch. So in the next steps of our project, we will have a plan and sketch for other steps.

Ahmet Emin Tosun

This week I had a responsibility of writing the analysis report and this report took all of my time and we have just talked about the design and interface of our project.

Vedat Şengül

This week we were supposed to start coding, but other friends needed help in requirement analysis report. Last week, we had exams and assignments. Therefore we just think about the design of interface. This week we will start to implement it. Rest of the week, we worked on report.

Yavuz Aşık

As the deadline of analysis report was yesterday we have written the report at the weekend. As we are planning to start user interface sooner, I have started to study some tutorial about java programming.

Uğurcan Tekin

For this week I have worked on fully in analysis report and I also have searched the most of IDEs to help us in designing of Akamai Web Toolkit.
