PERSONAL WEEKLY REPORTS:

Saliha ALTUNSOY

Project Leader, Gate Keeper

This week, we were busy with our design report. Before starting the documentation, we spend a lot of time on the architectural design of our software. We gathered information and then discussed them inside our group to come up with a consistent solution. I read the documents on what application services are and how a single user- multiple database (Heterogeneous Databases) architecture can be built. For the design report, I revised the introduction and project requirements parts. In addition to these, I drew the class diagrams. Moreover, we had a meeting with Mustafa Yüksel, and discussed the web service part with him.

Candan CEYLAN

Timekeeper, Optimist

During last week, we focused on our initial design report. First of all, we have made discussions about editor and web service. Then, for adding functionality to our GUI, I have examined the "listener" classes in the Java, learnt how to get keyboard, mouse vs actions and how to use them in the code. Canan and I developed our GUI according to our design. In addition to this, I have written the testing part of the initial design report.

Canan ESKİ

Initiator, Recorder

This week we have been working on our initial design report. We had meetings on how our architecture will be. We also had a meeting with Mustafa Yüksel to get advise about architecture. We concluded that we do not need web service. Candan and I have been working and GUI. We had already stated the general frame. At the time being we are trying to add functionality to it.

Yavuz GÖKIRMAK

Optimist, Initiator

During last week we were busy with report. We discussed architecture of the program two days. I have made readings about web service and do some coding on it. But we have

concluded that, we can do what we want without web service. I have drawn dfd's and data descriptions of report. And I have started coding on database connection.

Duygu GÖRGÜN

Devil's Advocate, Summarizer

This week, we were busy with our initial design report. Firstly, we made researches deeply about web service and editor. We made long meetings about how to built up the project. After Yavuz had drawn DFD diagrams, I drew sequence and activity diagrams and made explanations about them. Besides these, I arranged a meeting with Mustafa Yüksel, working at SRDC and we talked with him, got his ideas.

LIVING SCHEDULE

Task	Start Date	Expected Finish Date	Assigned to
Preparation of web site	13.11.2006	08.12.2006	Candan
Development of functional GUI	20.11.2006	21.12.2006	Candan & Canan
Making researches on Text Editor	15.11.2006	12.12.2006	Duygu, Saliha & Canan
Studying on Database Connections	15.11.2006	15.12.2006	Yavuz & Candan
