PERSONAL WEEKLY REPORTS:

Saliha ALTUNSOY

Project Leader, Gate Keeper

During the last two weeks I made searches on syntax highlighting issue. I analyzed JavaScript and HTML lexers, I looked for ways to combine these two. Moreover, I worked on making our code modular, in order to have more maintainable code.

Candan CEYLAN

Timekeeper, Optimist

This week, I have arranged our source code. By these changes, now we have easily understandable and traceable code. And I have implemented the "save" functionality. Also I have read some ajax-related documents in the <http://ajax-tr.com/> website.

Canan ESKİ

Initiator, Recorder

For the last two weeks I have been working on workspace functionalities of our IDE. I have also made search on how we can store configuration files of the IDE. I have made some changes on Drag and Drop but it still has problems.

Yavuz GÖKIRMAK

Optimist, Initiator

This week I almost finished the functionality of ftp and database modules. I have changed these modules' GUIs. I have started to read documentation about rinho (debugger). We are planning to entegrate rinho into our project.

Duygu GÖRGÜN

Devil's Advocate, Summarizer

This week, I studied about toolbar and menubar. I tried to add a property to this bars which is related to sub frames of our editor. I have not finished it yet. Besides these I studied design patterns and I made changes on our web page. I built up Photos page according to my friends requests.
