Weekly Report 14

Last week we had four meetings. First of them was on Tuesday. At this meeting we worked on the development of the web services of functions that enable the job seeker search job announcements via our system.

The second meeting was on Thursday. The main topic of that meeting has been the development of the web services of functions that will serve the users profiled as Employer to search for suitable employees.

On Sunday we had our third meeting. At that meeting we started implementing notification system.

On our last meeting mostly our notification system has been completed.

Next week we will be working further on the implementation of our system.

Last week we had four meetings. First of them was on Tuesday. In this meeting we worked on the web services about the searching job announcements.

Second of them was on Thursday. The topic of that meeting was the web services regarding to the searching job seekers.

Third meeting was on Sunday. In this meeting we continued to implement the web services of the notification system. Then on Monday we implemented notification system on our system.

Next week we will have three or four meetings. In these meetings we will work on the web services and the implementation of employer module.

Emrah Uyaroglu/AIVA

We had four meetings last week. First meeting was on Tuesday. Topic of that meeting was the web services of the job-seeker module (Announcement search).

The second meeting was on Thursday. In this meeting we worked on the web services of the employer module (CV search).

In third and fourth meetings, which were on Sunday and Monday, we worked on the web services and the implementation of the notification system.

Next week we will work on the employer module.
