

## **SBA Yazılım**

### **13.04.2008-20.04.2008 Weekly Report 7**

This week Esra and İpek implemented complex query handler section of our project (without gui). Its gui will be implemented this week. İpek had reimplemented her previous classes.

Kerem implemented the external cache (queries to Zargan).

Çiğdem is analysing reports for exceptional situations for our algorithm.

Makbule implemented the results section miner. She had also reimplemented her previous classes.

We are all testing our codes.

We had 2 or 3 internal meetings to decide on how to ask phrases to doctors while the program running.
