Tiran Software

Second Semester
Week 4-5

During these two weeks, a lot of work has been done for the development of version 1. Now we are capable of extracting formatted data from certain report types using our current template matcher.

Tahir Bilal

Many improvements in template matcher, also several new templates have been added.

Onur Deniz

Our lexicon have been improved and enlarged with new features.

Soner Kara

Preprocessor has been changed a lot to ease the work of template matcher. Also GUI integration.

M.Mert Karadağlı

Database implementation has been finished for the first version. Now we are capable of sending and receiving data through Postgresql.
