Serdar Dalgıç

WEEKLY REPORT

- Testing of weka.core.Instances finished. Some problems are encountered, any parallelization attempts that are failed due to the overhead of parallelization are excluded from the project. According to this fact, there have been some changes on Living Schedule
- Using subversion with Weka is experimented. Our project is imported into Eclipse and graphical interface of subclipse is being used. A tutorial about how to import our project is written to our google group[1].
- Using pj.jar in our PC's is experimented. Scheduler of PJ is tried to be executed. Several problems occurred, we couldn't manage to use scheduler in our PC's.
- Weka.core.Matrix package java classes are examined. The Matrix Decompositions in this package are decided to be parallelized. Meetings on this issue are arranged.
