

WEEKLY REPORT

- Continued researching the decomposition algorithms. Realized that the Cholesky decomposition used in original Weka project does not fit our needs in terms of being parallelizable. This goal is postponed to an unknown date in the future and parallelization of K - Means class has started.
- Testing of Utils and Instances classes continued.
- Attempts to make the project NAR - independent continued. Ways of making a grid and distributing the calculations on our dual - core laptops is being investigated.
