CENG 492 - Weekly Progress Report 2 – Bug Busters

Work Done:

- Işıl has prepared the project web page template and Burkay revised the details of the page.
- Çağrı and Caner installed and tried uDig, read tutorials, get know-how about its features and judged the suitability to our project.
- Işıl prepared the svn repository and uploaded the so far implemented part to repository. Işıl has also begun to code best path algorithm.
- Burkay solved the problem to use svn inside Netbeans on Windows.

Work to Do:

- Caner will work on Train Information System webpage design.
- Işıl will continue to code the best path algorithm and will prepare a sample database of connected cities.
- Çağrı will continue working on uDig.
- Burkay will work on GPS simulating.
