## *CENG 492 - Weekly Progress Report 6 – Bug Busters*

---

### Work Done:

- Işıl started working on knowledge database.
- Caner keeps editing RIS website pages, corrected badly formatted content, etc.
- Çağrı find some solutions to show the map inside a browser window and also on Google earth.
- Burkay debugged the GPS simulation interface code.

### Work to Do:

- Caner will continue working on Railway Information System website's pages, and add some features such as calendar.
- Işıl will continue implementing knowledge database.
- Çağrı will continue working on map issues, marking the live train positions inside web browser map or Google earth.
- Burkay will finish the GPS simulation interface by removing all the bugs.
