

To-do List for 31.12.2012

Abdullah Hasan Taher Bayrakdar

- Installing PHP, Apache and MySQL on Raspberry and deploying "smarthome_raspberry_db" database. [Whenever the internet connection is provided]
- Trying to design a simple user interface to control the home appliances [as a preparation for Term1 Demo].

Anıl Ulutürk

- Trying to run Zigbee transmit/receive application on Raspberry, if not possible (because of internet connection), implementing same code on Python.

Şerafettin Öztürk

- Working on combining frame code and PIC code.
- Working on making improvement on PIC code by using extra functionalities of the board.

Zeynep Mavuş

- Also Working on embedding the frame generator code into PIC code.
- Working on PIC to make leds usable on indicating on/off state instead of seven segment display.
