

## WEEKLY REPORT

### TRANQUILLUM

14/04/2013

#### **Abdullah Hasan Taher Bayrakdar**

- Edited the content of group's webpage [Screenshots to be added soon].
- Searched for Innovative features that could be added to the project. Because there is no smart grid, we have few choices in the power consumption related issues (like warning the user about a long period high power consumption for a specific device).
- Write and Edit some sections in the Test Document.

#### **Anıl Ulutürk**

- Startup scripts in raspberrian wheezy (etc/rc?.d/ stuff) has some problems, will try different options

#### **ŞerafettinÖztürk**

- Tried serial interface on cc2530 from usb but it just works to program the device.
- Tried serial interface on cc2530 from RS232 it works fine.

#### **ZeynepMavuş**

- Implemented washing machine simulation interface on raspberry.
