## Personal statement

---

I am a fourth year computer engineering student. I have always loved solving problems and choosing a computer science major has opened new roads for me and has given me far more power in dealing with different problems of great scales that I look forward to dealing with and hopefully solving in the future. My ultimate goal is to learn as much as I can and use those skills for helping other people as well as for the sake of the sheer excitement of learning.

## CS Skills

---

- Programming Languages: C, C++, C#, Java, JavaScript, Python
- Experience with: SQL, HTML, CSS, PHP, OpenGL, Mahout, Hadoop, Linux, Embedded System Programming

## Work Experience

---

### Software Engineer Intern, Llampa, Kosovo

*(July 2015 – September 2015 )*

Work Description:

- I was involved in further development of an ongoing project called KSpas. "KSpas" is basically a POS(Point of Sale) software designed for small commercial enterprises.
- My work involved planning adjustments to other new compulsory requirements and also working on improving user interfaces.

### Software Engineer Intern, Parabol Yazilim, Turkey

*(July 2016 – September 2016 )*

Work Description:

- I was involved in a project that involved the use of a highly developed system for traffic control and monitoring in many cities across Turkey
- My work mainly consisted of, but was not limited to, designing a mobile application which would facilitate the usage of this system by the intended users.

## Education

---

### Middle East Technical University – Computer Engineering

*(September 2013 – Present)*

## Hobbies & Interests

---

I love watching different kinds of sports. The ones I follow more frequently are football, tennis and boxing. Apart from watching I also practice some sports, I play football every once in a while with my friends. I've also been a member of the university boxing club since last semester.
