

# VIP Assistant

## Visually Impaired People lack ...

awareness of indoor  
surroundings

concrete plans for  
where & how to go

updated info  
about locations

## Solution

A navigation and information  
system, using technologies of

Mobile development

Bluetooth Low Energy  
Beacons

## What do we provide?

### Android Mobile Application

*which is specialized for  
visually impaired users*

### Indoor Navigation Engine

*that is powered by Bluetooth  
Low Energy technology*

### 3D World Map

*that contains indoor places*

### Server Support

*to provide real-time indoor crowd  
statistics and higher security*
