

Intuitive Interface
Clear dashboard for daily work

AccrediX

Engineering Accreditation Management Platform

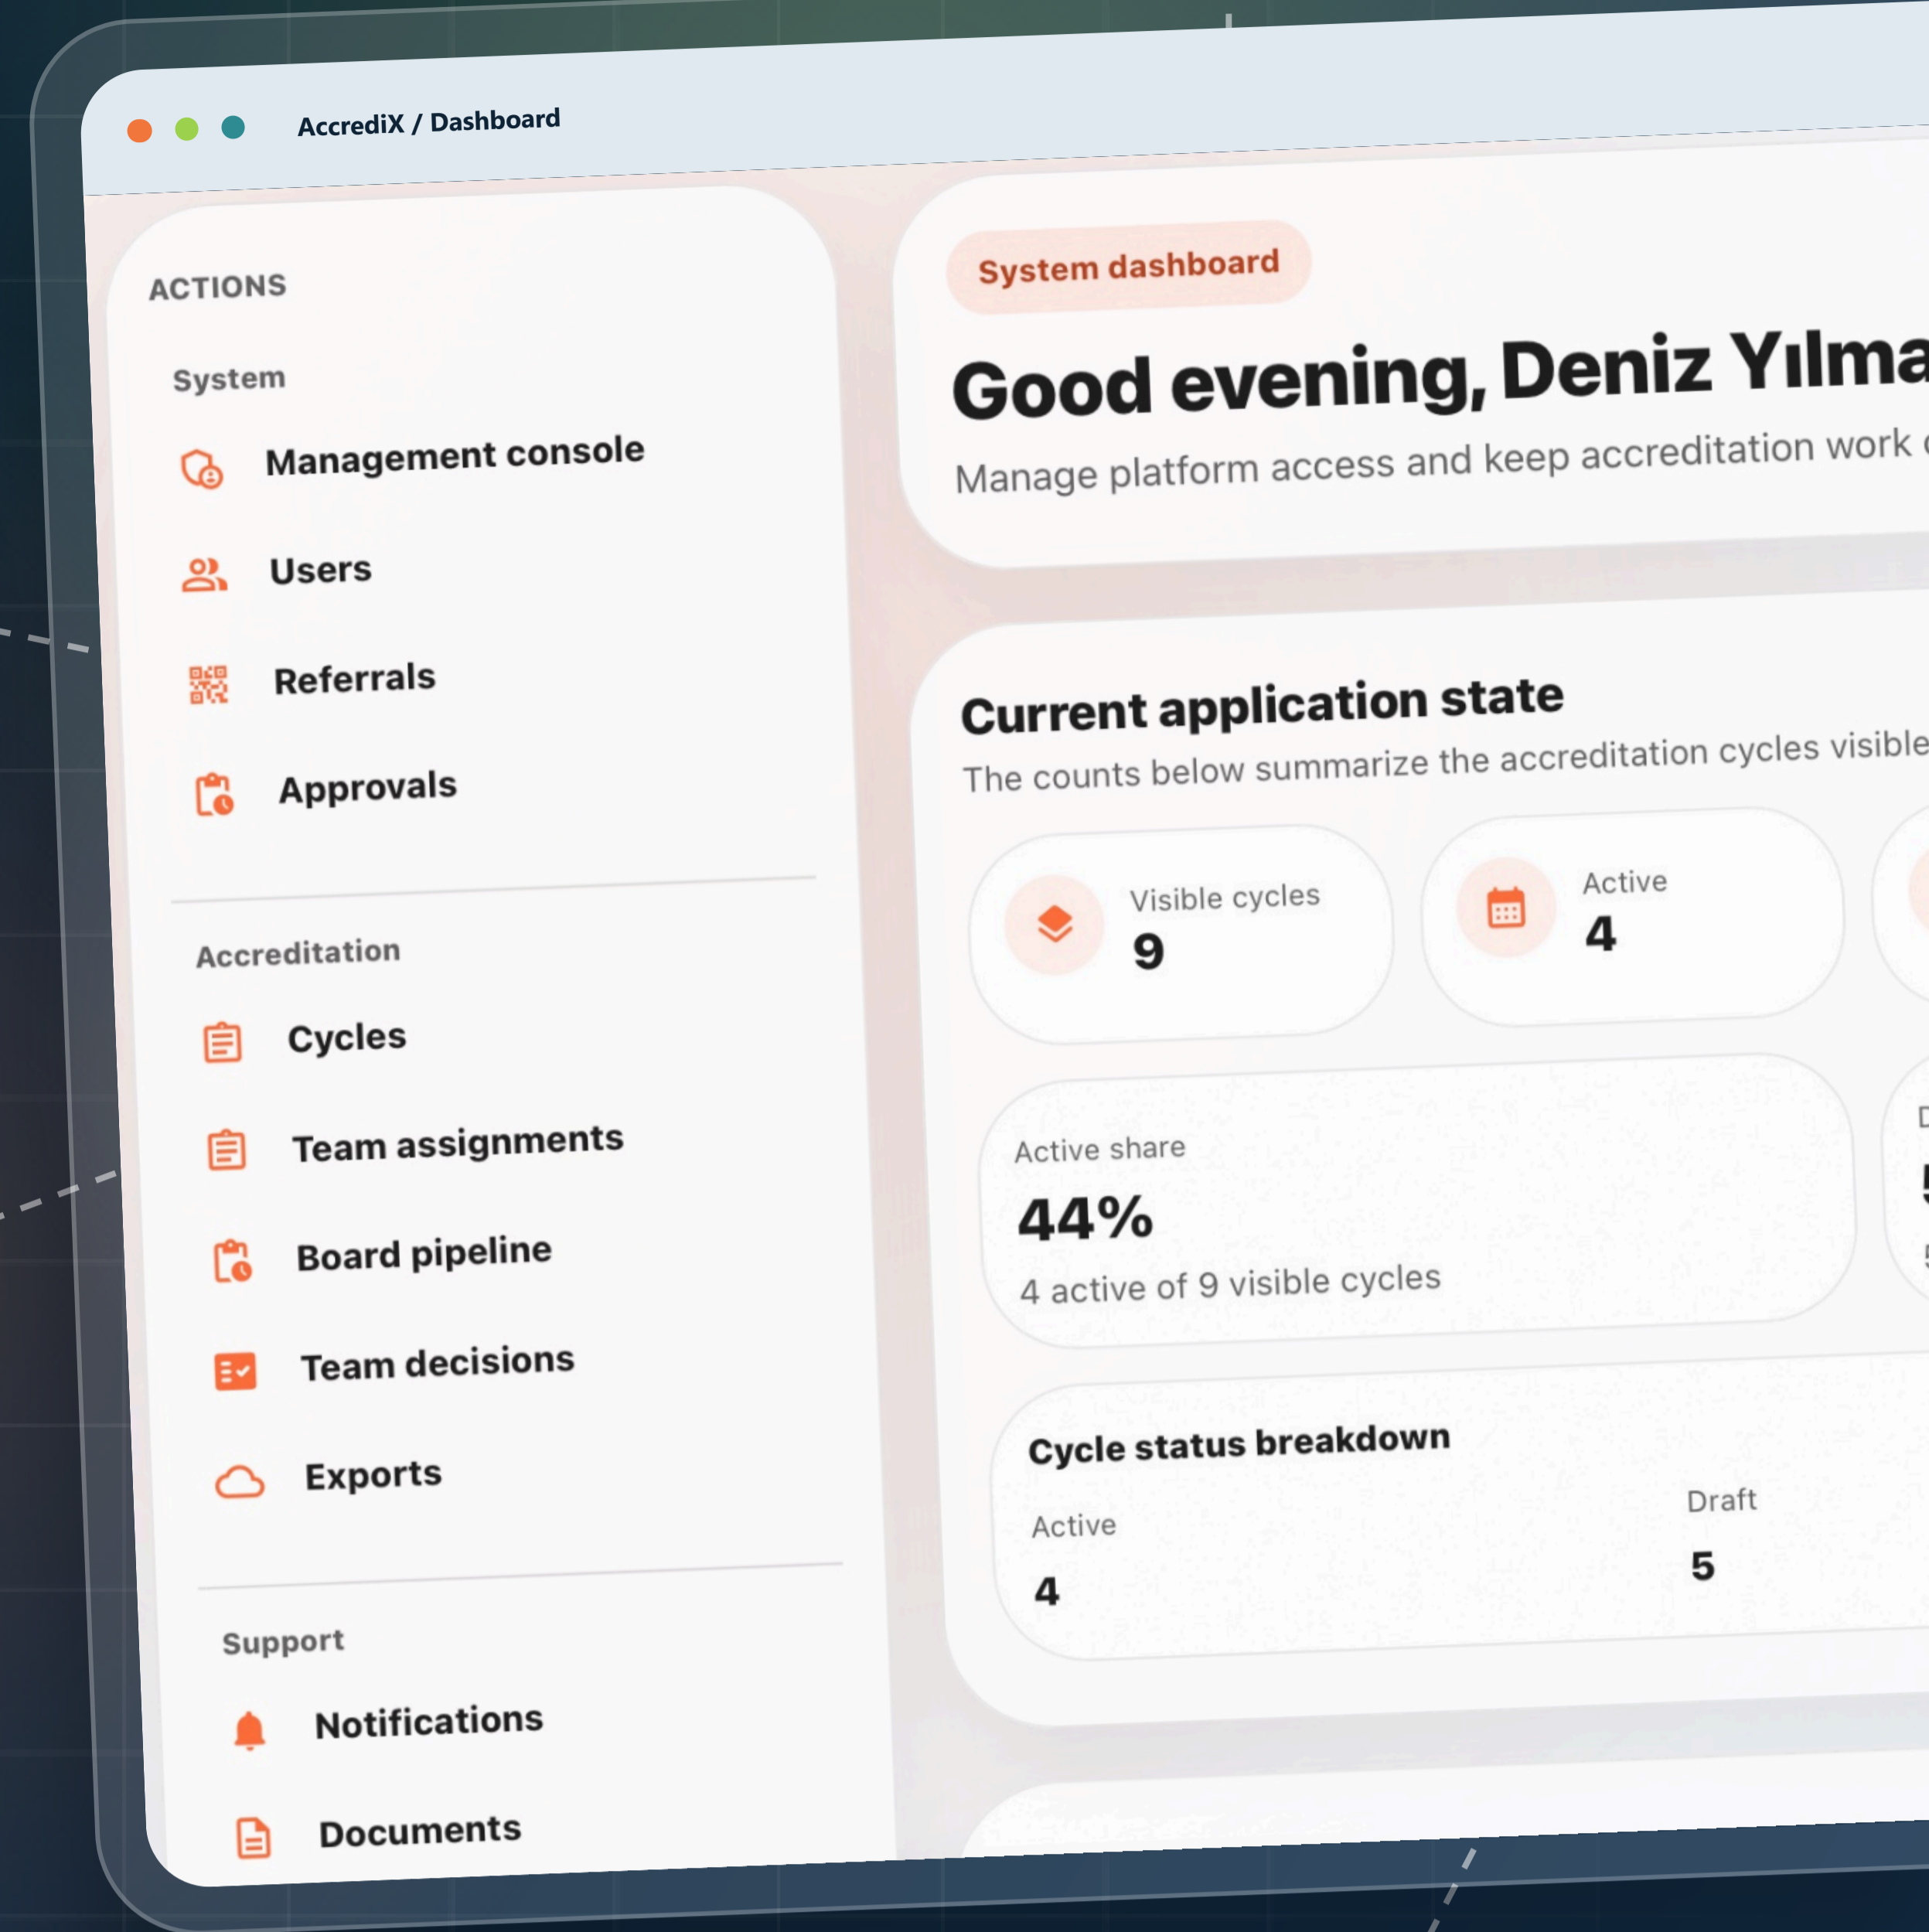

A unified platform for managing the full accreditation process.

AccrediX supports application submission, ODR preparation, evidence organization, review, decisions, and archive records in a secure and structured environment for institutions and accreditation teams.

Role-Based Access Control
Each user sees the right actions

Team Coordination
Tasks, users, and approvals connect

Progress Tracking
Status and counts stay visible

PROBLEM

Accreditation work gets fragmented.

- Many actors, many handoffs
- Manual report preparation
- Limited process visibility
- Sensitive data exposure risk
- Files spread across tools
- Weak version tracking
- Email-based coordination
- Disconnected final records

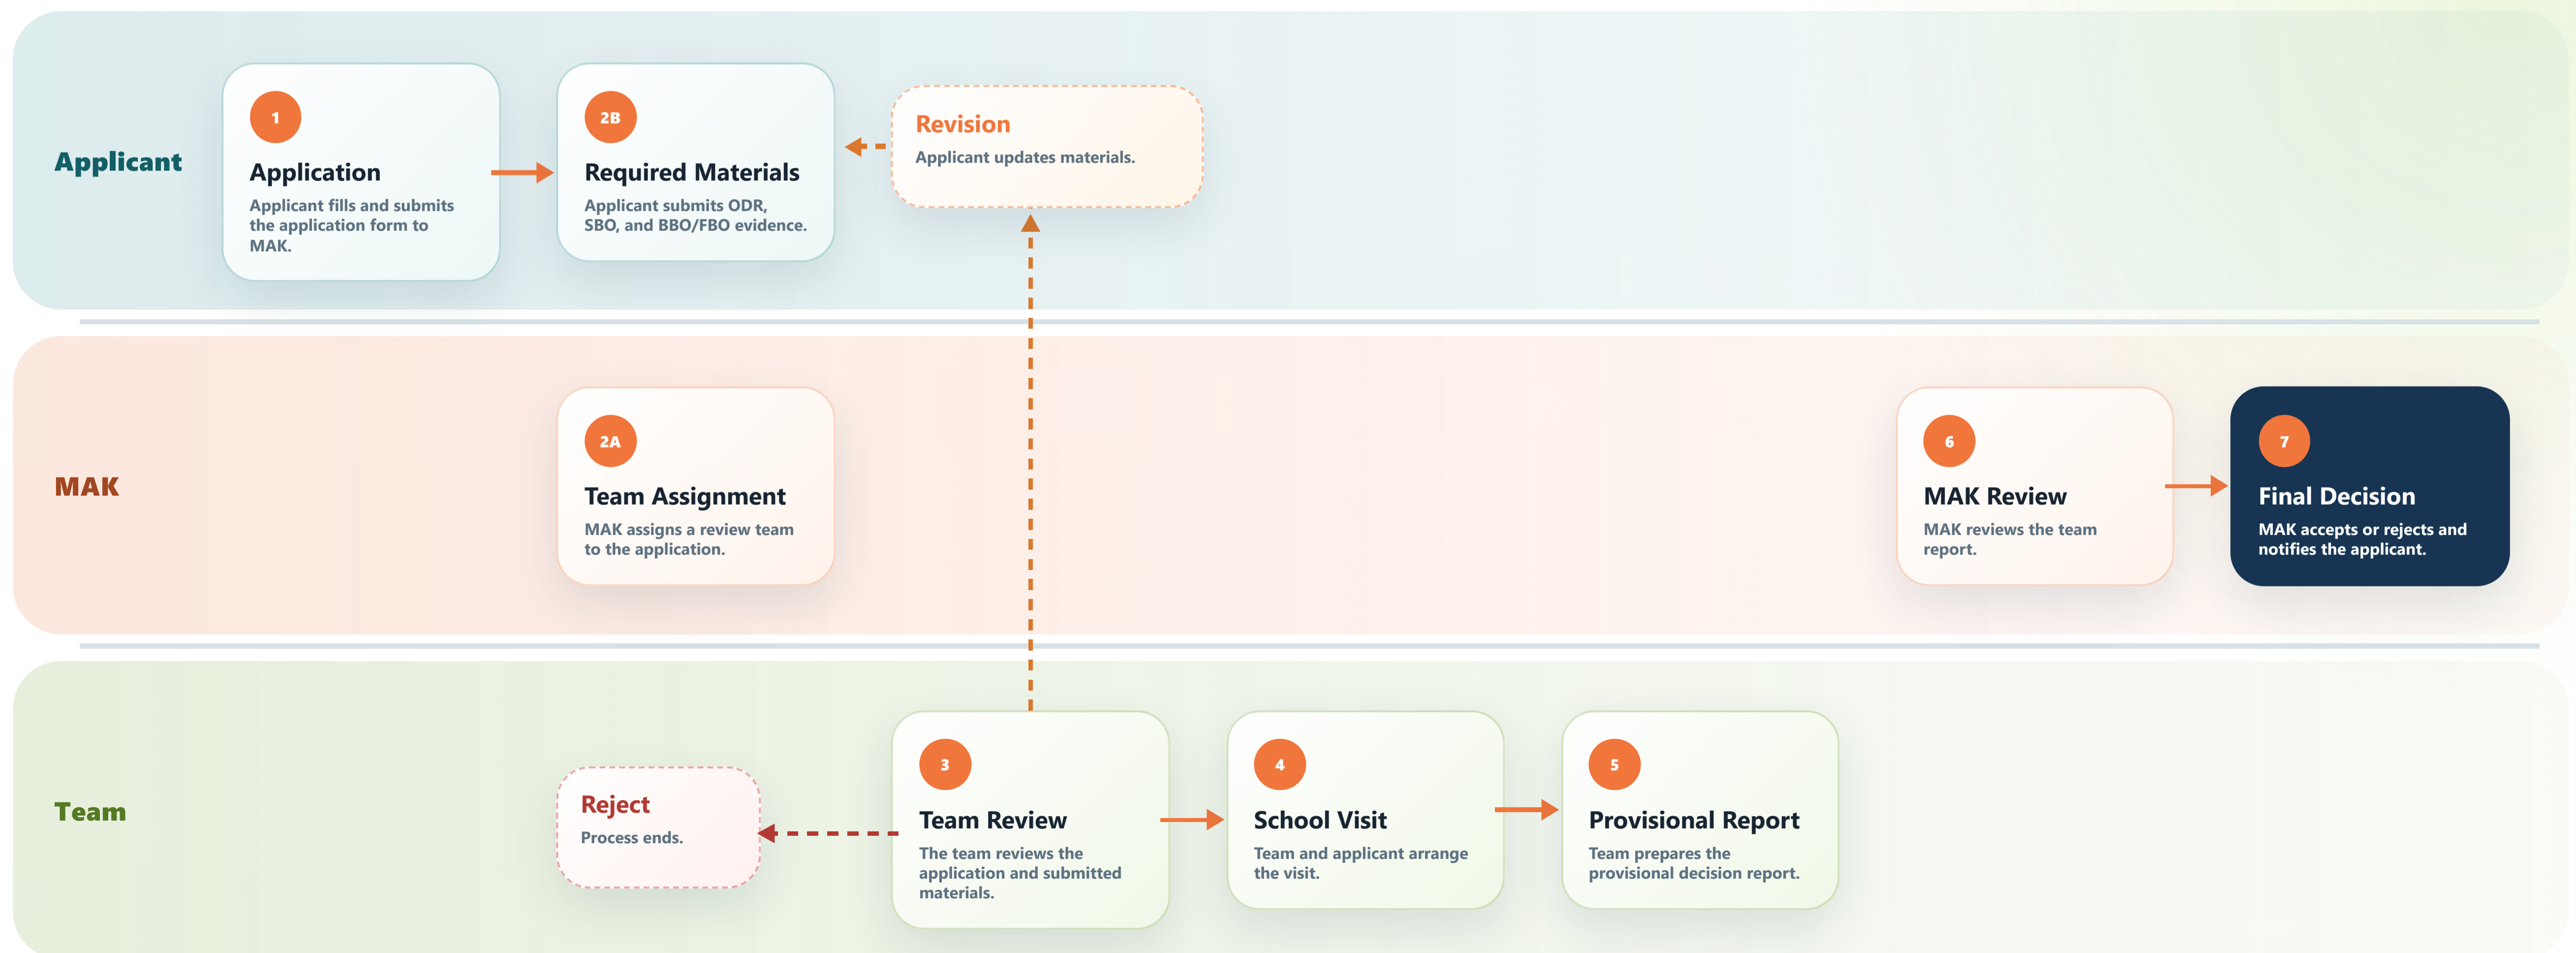

SOLUTION

One system for the full process.

- Guided accreditation steps
- Role-based workspaces
- Structured evidence rooms
- Decision and archive records
- Self-hosted data control
- Verified institution access
- Digital forms and submissions
- Shared review workflow
- Progress and notifications
