

# Buddies

## Real objects become your speaking buddies.

Most language courses feel passive and disconnected from the real world, making it difficult to keep children engaged. Buddies solves this by turning everyday objects into adaptive AI speaking companions that make language practice playful, contextual, and level-based.

### Classroom

Structured lessons build language skills step by step. Complete activities, earn stars, and level up.

Treasure Hunt

Classroom

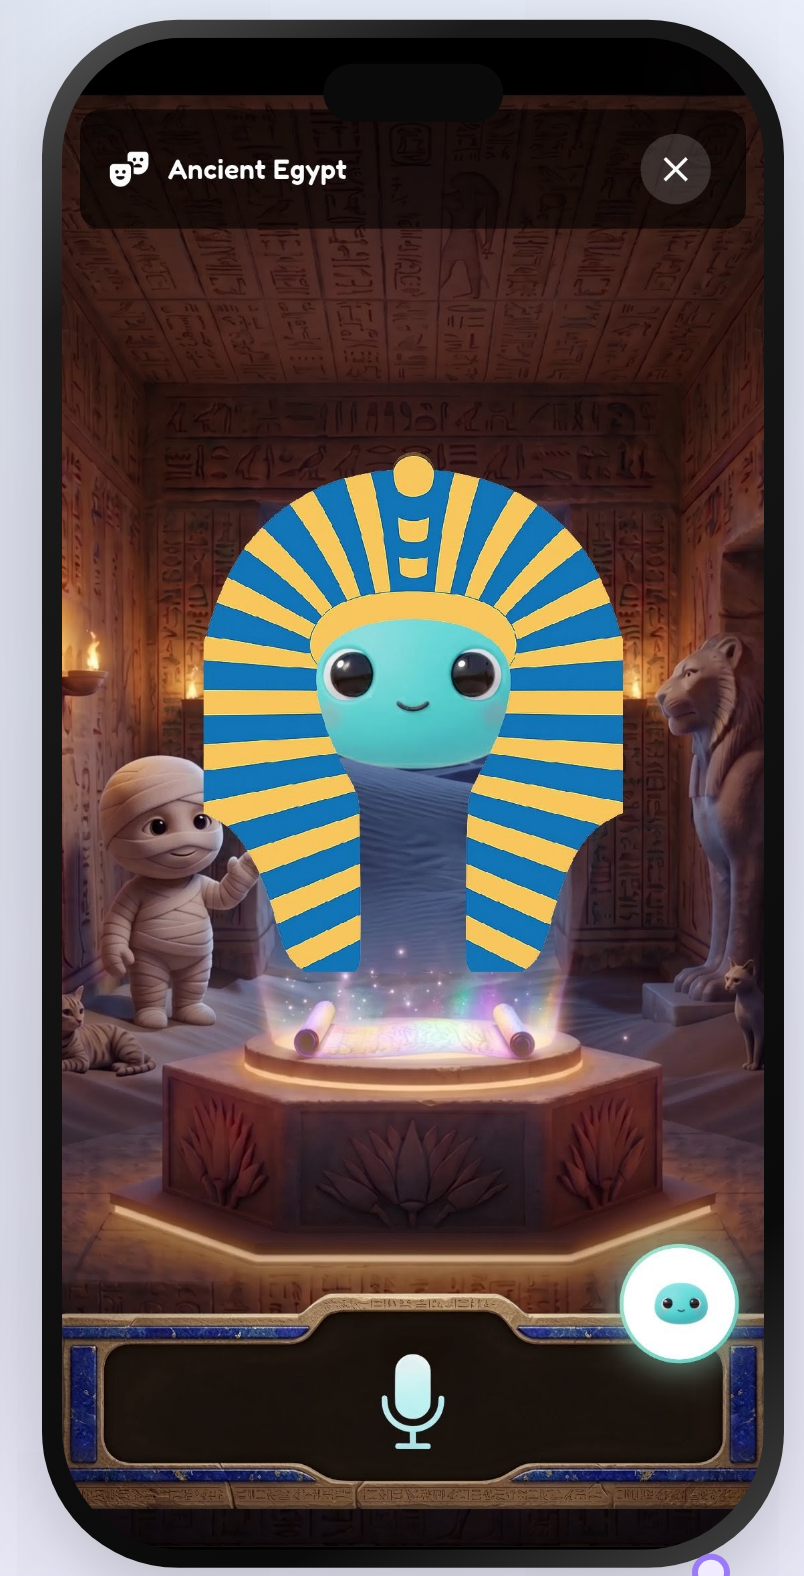

Home

Playground

### Playground

Point the camera at any object, it becomes a cartoon buddy and starts a live voice conversation.

Scenario

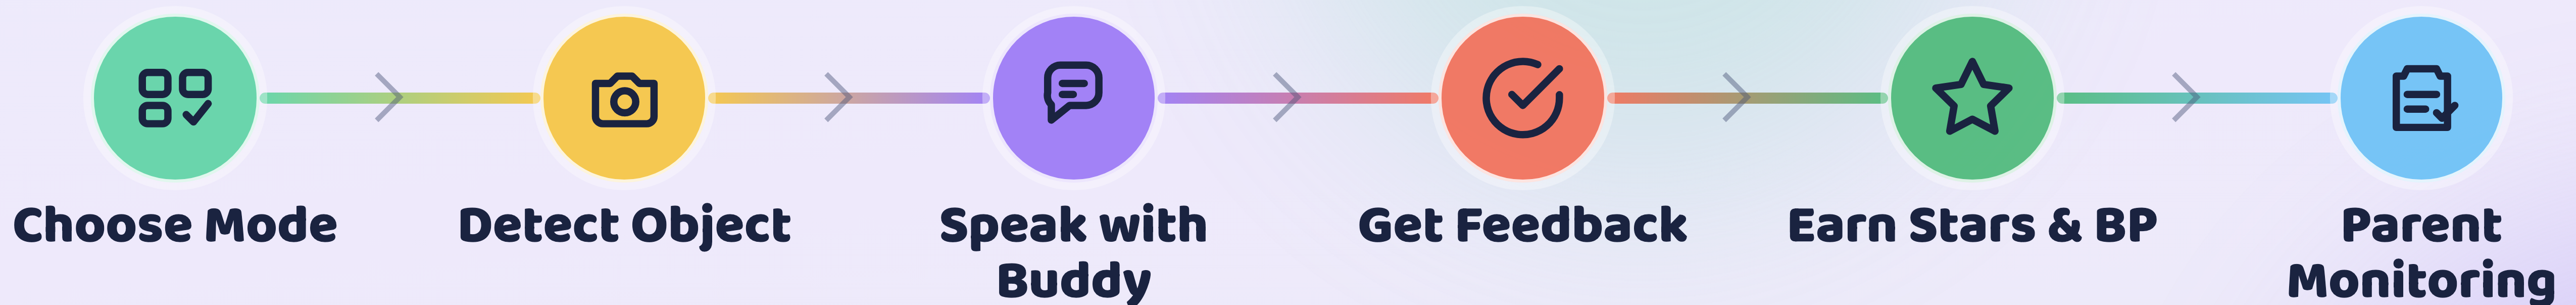

### Treasure Hunt

Find a target object nearby, scan it with the camera, and practice vocabulary while exploring the space.

### Scenario

Enter themed worlds like Ancient Egypt or Space. Story-driven conversations make vocabulary stick.

## How Buddies Works

### Language Progression

Progress from Starter to Mover and Flyer. Stars unlock advanced content.

### Buddy Helper

A native-language helper lets children ask questions in any mode.

### Gamification & Store

Earn Buddy Points and spend them on accessories in the store.

### Parent Dashboard

PIN-protected area for chat review, AI memory, and time limits.

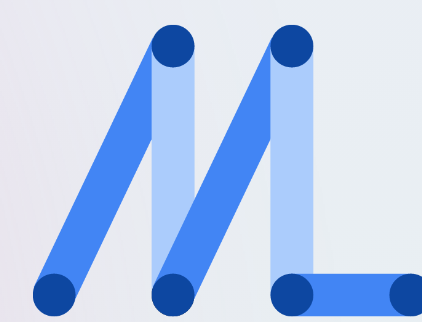

### Supported Languages

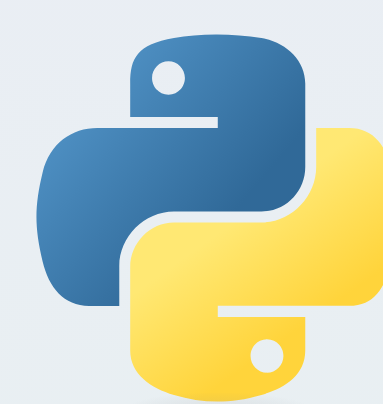

Flutter

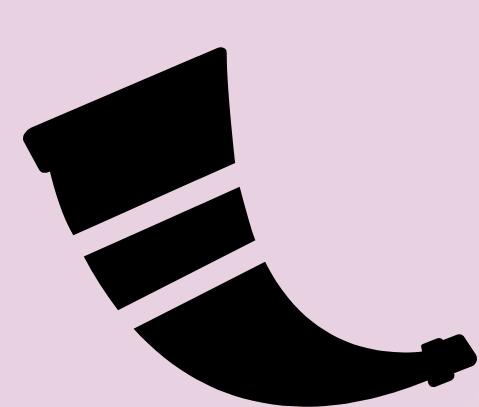

Gemini

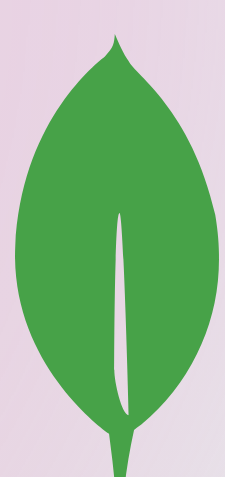

ML Kit

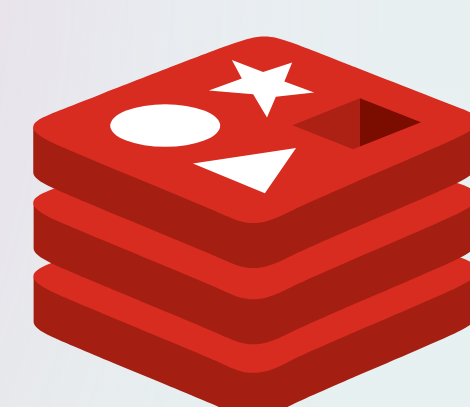

Python

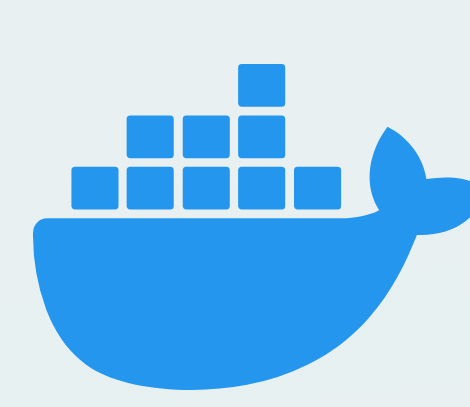

Flask

MongoDB

Redis

Docker

### Team

Araz Soleymanpour

Bahar Salman

Serdar Dünder

Taha Karageldi

Yaman Özdoğan
