

GLYPH

AI-Powered Video Creation Workspace

GLYPH is a web-based AI video editor that combines a professional timeline, media library, animated text tools, stock search, and generative AI. Users describe edits in everyday language, and GLYPH's conversational AI agent orchestrates asset generation, media analysis, arrangement, and styling for a cinematic composition.

Animated Text Templates & Titles
Apply reveal effects, motion text, shapes, and title templates.

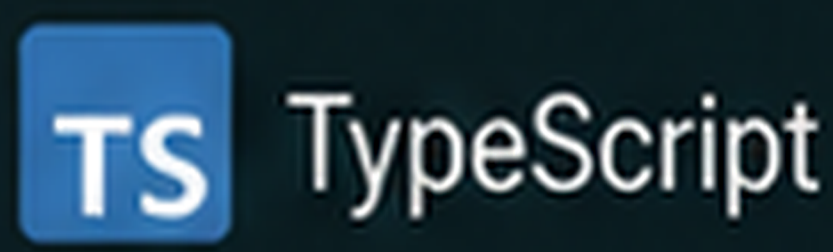

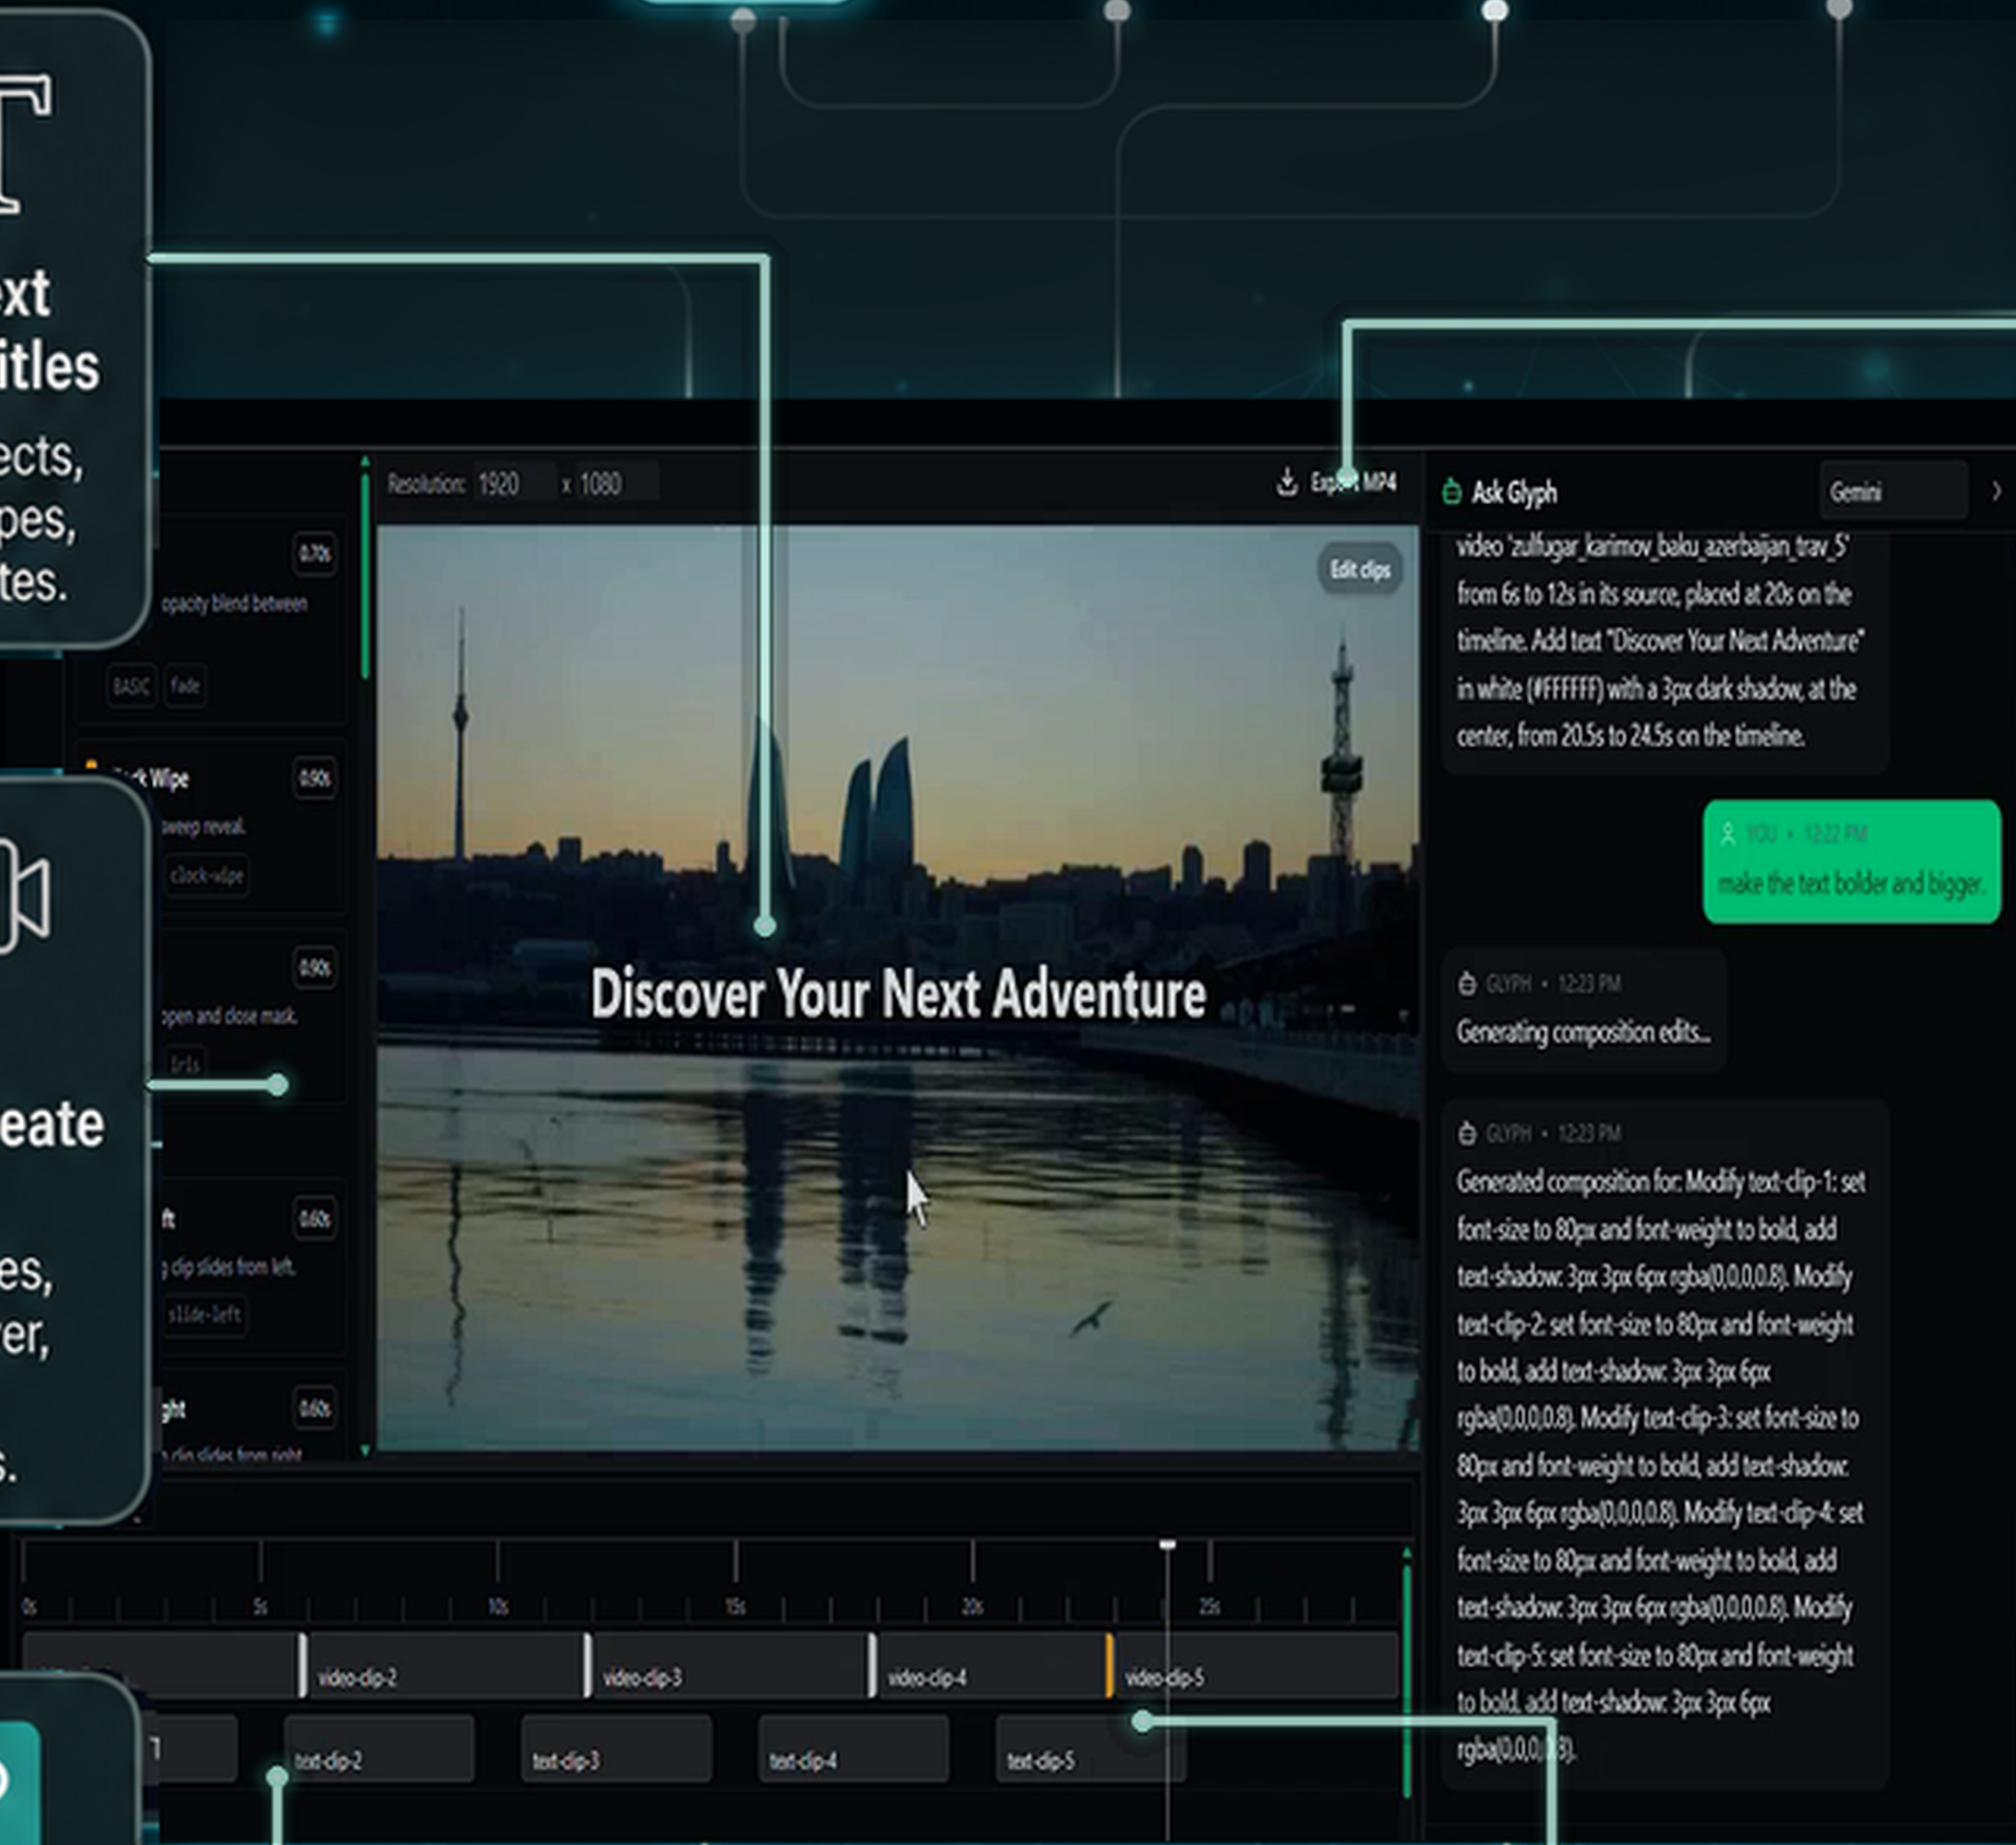

AI Media Generation: Create Assets
Generate images, video, voice-over, and layout compositions.

Media & Stock Assets: Search & Import
Search Pexels and video stock libraries, then import.

High Quality Export
Render final compositions and export in high-quality formats.

Conversational AI Agent
Describe desired edits in everyday language to orchestrate asset generation.

Multi-Track Timeline: Precision
Manage multiple video and audio tracks for precise compositions.
