

# PROJECT THEMIS

System  
Software  
Configuration  
and  
Management  
Tool

Do you wish for a program to manage all your systems?  
Tired of editing configuration files?  
With our web and command line interfaces you can  
effortlessly create configurations, edit or delete  
existing ones and restart services to apply changes.

## Unified

Themis brings all your system  
management under one roof.

## Modular

Its plugin based architecture and open  
source nature makes Themis extensible.

## Easy to Use

With a flexible yet consistent ui  
Themis is user-friendly.

## Everywhere

Be it a Linux pc or a remote server,  
browser or terminal. Themis supports it.
